EDUCATION

Koneru Lakshmaiah Education Foundation, Vijayawada

Bachelor of Technology in Electronic and Computer Science Engineering

May 2019 – June 2023

B.E. - 8.62 CGPA

SKILLS

- **Programming Languages:** Java, JavaScript
- **Web Technologies:** HTML, CSS, Bootstrap, TypeScript
- **Database Management:** SQL, PostgreSQL
- **Libraries & Frameworks:** Angular, Spring boot, Angular Material, React, FusionCharts
- **Tools & Platforms:** Git, VS Code, IntelliJ IDEA
- **Soft Skills:** Communication, Creative Thinking, Teamwork, Leadership

EXPERIENCE (3+ YEARS)

Software Engineer

DimensionLeap

Apr 2025 – Present

Hyderabad

- Architected and developed backend services for a healthcare platform, owning pharmacy, patient, clinic, treatment-plan, and payment workflows across multiple business-critical modules.
- Built a scalable pharmacy cart and inventory management system with automated expiry-based batch allocation, reducing manual intervention and improving inventory accuracy.
- Integrated **Razorpay**, **PayU**, and Credit Management Service (CMS), implementing fault-tolerant payment processing, transaction validation, and reconciliation workflows.
- Developed real-time healthcare communication features using **Spring Boot**, **WebSockets**, and **Agora SDK**, enabling live notifications and secure video consultations between doctors and patients.
- Designed RESTful APIs for patient vitals, appointment booking, treatment plans, and cross-module integrations, ensuring high reliability and data consistency across distributed workflows.
- Improved production stability by implementing comprehensive validations, structured logging, and edge-case handling, accelerating issue resolution and reducing operational risks.

Associate Software Developer

Brane Enterprises

June 2023 – February 2025

Hyderabad

- Engineered a comprehensive user interface for **Page-Builder**, enabling flexible landing page creation and customizable styles for individual pages and content elements, offering extensive design control.
- Integrated comprehensive REST APIs throughout the application, ensuring smooth communication between the front-end and back-end components and facilitating efficient data handling.
- Developed over six distinct types of charts using the FusionCharts library, tailoring each chart type to meet specific data visualization needs and requirements.
- Architected the **dashboard** interface, integrating multiple charts into a cohesive and user-friendly layout that aggregates over 10 key metrics and insights.
- Customized multi-tabbed dashboards, increasing user efficiency and enhancing the overall user experience with seamless navigation between **10+** different data sets and visualizations.

Associate Software Developer Intern

Brane Enterprises

November 2022 – May 2023

Hyderabad

- Achieved **40% overall code coverage** by writing comprehensive test cases for the application, ensuring more robust and maintainable code
- Increased user flexibility and customization options by **40%** by providing customizable design options for entity cards, including dropdowns and calendars.
- Crafted over 20 card designs for representing various entities, using data-driven templates to ensure accurate and engaging presentations
- Addressed over **30 bugs**, leading to optimized and refactored code, achieving enhanced application performance and stability.

PROJECTS

AesthatiQ Healthcare Platform | *Spring Boot, MySQL, WebSockets, Agora, Razorpay, PayU* **Apr 2025 – Present**

- Owned end-to-end backend development for the Pharmacy Module, implementing cart management, treatment-plan-driven product flows, and expiry-based batch allocation logic.
- Designed and developed REST APIs for patient, clinic, doctor, and treatment-plan workflows, ensuring seamless integration across healthcare modules.
- Integrated **Razorpay** and **PayU** payment gateways with secure transaction verification, webhook processing, and failure-handling mechanisms.
- Implemented real-time communication features using **WebSockets**, enabling live updates across booking and patient management workflows.
- Integrated **Agora Video Calling** for secure doctor-patient consultations, including token generation, session management, and connectivity handling.
- Improved platform reliability through comprehensive validations, logging, and edge-case handling, reducing operational risks in critical healthcare workflows.

Spotlight Credit Management Platform | *Spring Boot, MySQL, Razorpay* **Apr 2025 – Present**

- Owned the development and enhancement of the **Credit Management Service (CMS)**, implementing business rules, validations, and credit tracking workflows.
- Integrated **Razorpay** payment services with CMS to automate credit updates and ensure accurate financial reconciliation.
- Implemented idempotent payment processing and robust failure-handling mechanisms to prevent duplicate transactions and inconsistent credit states.
- Resolved complex production issues involving payment mismatches, webhook failures, and transaction inconsistencies, improving system stability.
- Enhanced observability through structured logging and debugging mechanisms, accelerating issue diagnosis and resolution.
- Collaborated across multiple modules and services to ensure reliable payment workflows and scalable financial operations.

Snowbeadz-admin | *Freelance, Angular* **November 2024 - February 2025**

- Developed a feature-rich admin panel using Angular to manage products, categories, users, and orders for an online dress purchasing platform.
- Implemented CRUD operations and dynamic forms to allow admins to effortlessly add, edit, and delete dress collections.
- Built responsive, mobile-friendly UI components using Angular's Reactive Forms, Material Design, and custom SCSS styling.
- Applied Angular services and RxJS for efficient state management and API integration with a backend service.
- Optimized performance using lazy loading, trackBy, and OnPush change detection strategy in high-traffic components.
- Collaborated with the client to customize UI/UX and added enhancements based on feedback for better usability.

Dashboard Customization Platform | *Angular, Java, REST APIs, FusionCharts* **June 2023 – February 2025**

- Led the design and development of a highly customizable dashboard platform, enabling users to personalize layouts, widgets, themes, and data views based on business requirements.
- Developed and integrated **6+ interactive chart types** using FusionCharts, delivering dynamic data visualizations and actionable business insights.
- Implemented drag-and-drop widgets, multi-tab dashboards, theme customization, and user-specific filtering capabilities, significantly improving usability and flexibility.
- Designed and integrated RESTful APIs using **Java Spring Boot**, enabling seamless communication between frontend and backend systems while supporting efficient data processing.
- Optimized application performance and dashboard rendering, improving overall system efficiency by **30%** and reducing page load times.

Thrusang'22 Fest website | *Django, HTML, CSS, JavaScript*

February 2022 - March 2022

- Created and maintained **the website for Thrusang'22**, a large-scale national-level technical fest, ensuring smooth operation throughout the event.
- Devised a responsive website using modern front-end technologies like HTML, CSS, JavaScript and Django, providing real-time updates for events and schedules.
- Integrated backend systems using Python to manage user registrations, event data, and feedback submissions.
- Handled frontend and backend maintenance during the fest, ensuring **99%** uptime for continuous access to event-related information.
- Optimized performance for 200+ concurrent users with robust server-side handling and efficient database management.

Portfolio Website | *React, Styled-components*

August 2024

- Constructed a portfolio website showcasing **3+** projects with detailed descriptions and visuals.
- Incorporated **5** interactive features using Framer Motion, resulting in smoother animations and transitions across the site.
- Orchestrated a responsive layout with Styled-components, ensuring **100%** compatibility across all devices and screen sizes, leading to **25%** faster load times on mobile devices.

HACKATHONS WON

E-commerce of Agricultural Products Market | *Django, HTML, CSS, JavaScript*

December 2021

- As a UI Developer for Lexicon 2.0 Hackathon, I was responsible for crafting the visual and interactive elements of the platform, ensuring a seamless and engaging experience for participants.
- Designed an engaging and adaptive user interface using HTML5, CSS3, and JavaScript.
- Facilitated intuitive navigation across multiple hackathon categories and events, improving user engagement by **20%**.

CERTIFICATIONS

- **Angular by Udemy**
- **SQL Intermediate Certification** (HackerRank)
